Lake Rotorua is an excellent fishery which holds very high numbers of fish. This time of the year they migrate to the cold stream mouth and produce some excellent fishing.

The Waiteti mouth has produced both brown and rainbow trout after dark, and a fresh run of browns and rainbows have been reported moving through the Ngongotaha and Utuhina streams during and since the last lot of rain.

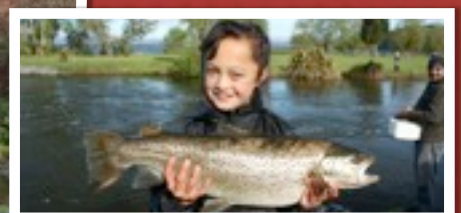

Lake Rerewhakaaitu is a bit further out of town but this is an excellent shoreline fishery with large stock of rainbows, which cruise the long shoreline.
